

Rising 5th Grade Summer Activities

Dear Friends,

Happy Summer! Over the summer, I would expect you to read at least three books if not more. Pick books that interest you and then find a nice cosy spot to sit and read. Read anywhere; on a bus, in a car, on an airplane, on the beach, but READ.

I have also included three websites. These websites are a great and fun way to practice your math facts, especially the multiplication facts. The websites are: **mathgames.com**, **funbrain.com** and **hoodamath.com**.

I have found a website called [www.educationworld](http://www.educationworld.com) which has a variety of activities to do to encourage your child to keep on learning. This website also has recommended summer reading for rising 5th and 6th graders.

Have a great summer, but remember to take some time out to read and practice your math.

Sincerely,

T. Susan
